The Hardcore Series

The Hardcore Series are the top-class products within the Evolution Airsoft products family. The Hardcore Series guns are designed to meet the demand for superior-quality products coming from professional airsoft players looking for performance and ultimate realism. For their sophisticated technical features the Evolution Airsoft Hardcore Series guns are the state of the art in the airsoft industry. The ultimate realism, perfect finishing and attention to details make the Hardcore Series the most wanted item also by collectors.

As the first release under the Hardcore Series, Evolution International S.r.l. chose the legendary LR-300 as in the real guns world the LR-300 is the same superior-class product as the Hardcore Series are in the airsoft world.

The Evolution Airsoft LR-300 has been designed and developed in Italy by Evolution International S.r.l. starting from the real LR-300 blueprints. It offers the ultimate realism featuring worldwide exclusive licensed trademarks and design, unique serial number and a real full metal construction for ultimate durability. The only plastic parts are in fact the pistol grip and the butt-plate, while all other parts are made of aluminum, several of which cnc machined from billet. For the most exciting and realistic shooting experience the LR-300 features a patented Electric Blowback mechanism which fully replicates the action of the real LR-300 DIGS® system.

Licensed Masterpiece

The Evolution Airsoft Hardcore Series LR-300 is the official airsoft replica of the real LR-300, produced under worldwide exclusive license granted to Evolution International S.r.l. by Z-M Weapons, U.S.A. The LR-300 features exactly the same logos and trademarks as the real gun counterpart whose design has been accurately reproduced in the airsoft version using the real gun blueprints and taking measurements directly on the real LR-300. We can easily say that the Evolution Airsoft LR-300 is the most detailed and realistic airsoft replica today available on the market.
